14 December 1960

UNITED STATES INTELLIGENCE BOARD  
COMMITTEE ON DOCUMENTATION

IBM Demonstration: Magnetic Tape-Producing Typewriter

1. Arrangements have been made with the International Business Machines Corporation (IBM) for a demonstration of their magnetic tape-producing typewriter. This is essentially a black box attachment to the Model 721 typewriter which allows for direct generation of magnetic tape upon typing.
2. The presentation of specifications and the demonstration will be given on 12 January 1961 in the CIA East Building Conference Room from 1000 to 1200 hours. Please call the names of those planning to attend to the Secretary [redacted] by Monday, 9 January 1961.
